Stevita®

NATURALS

About Stevita

Stevita Brazil - Since 1984 Promoting Education, Fair Labor, & Sustainable Agriculture. Bringing Sweetness to People & Our Planet.

Organic

"First do no harm", this simple statement from the Hippocratic oath also describes why choosing Organic is so important! At Stevita Naturals, we nurture each stevia seedling with love, not toxic chemicals, bringing you the purest best tasting sweeteners available.

Non GMO

You have the right to know where your food comes from and the role it plays in your life and the lives of others. This is just one reason Stevita is committed to providing healthy sweeteners and snacks which are Not genetically modified and are Non GMO.

Fair Trade

We source 100% of our stevia from its natural habitat in southwestern Brazil. There, a small cooperative of fair-trade family farmers produce the purest best tasting stevia.

Authentically Sweet

Our stevia extract is made from two ingredients: 100% Brazilian organic stevia leaves and purified water. The result is an authentically sweet lip-smacking stevia with no aftertaste. And unlike other stevia brands, Stevita® stevia is NEVER grown or sourced from China, and contains no artificial fillers, sweeteners, or other ingredients. Just perfectly natural sweetness to support your healthy lifestyle (and satisfy your sweet tooth)—from our farms to your table.

STEVIA

Oscar's Mother Flora Rodrigues - Limeira, Brazil 1941

History

Rooted in Community

Born & raised on a Brazilian farmstead, founder, Oscar Rodrigues, enjoyed the sweet wild Stevia plants his grandma gathered on his family's farm.

Fast forward to 1982. Farmers in Marangra, Brazil form a Stevia growing cooperative.

In 1984 these farmers, local government, and the University built the first extraction facility in North and South America - Stevita.

Finally, in 1988 The Rodrigues family introduced Stevita Naturals in the US.

Stevita - Responsible

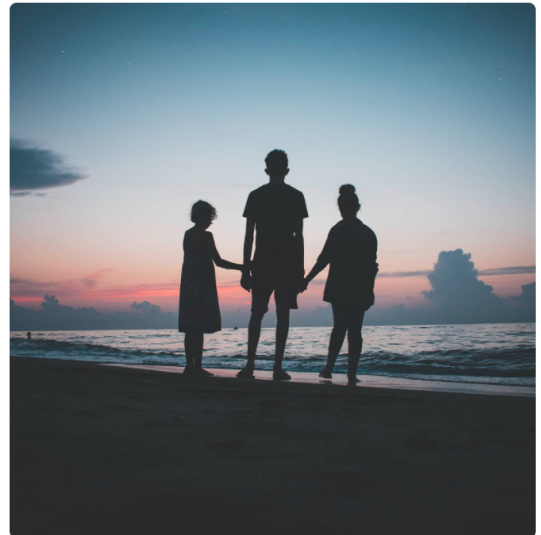

A Sweeter World

As Stevita Naturals grows, so does our commitment to those family farms and Oscar's original promise and vision.

Currently, we offer literacy programs, for farmers and their families—many of whom still face illiteracy. We are working on creating a community funding loan program where farmers can either lend, borrow, rent, or buy the equipment they need for the farms without incurring lifelong debts.

On behalf of our founder and family farmers, we thank you for supporting our mission to bring sweetness to people and the planet.

~The Stevita Naturals Family Team
